Set Up a Secure Development Environment

VS Code Installation with Git Guardian & Sonarlint Exensions

Installed git (and tried a couple times to config my name $\ensuremath{\mathfrak{U}}$)

```
MINGW64:/

Charlie Hernandez@LAPTOP-53GCKKDB MINGW64 /

$ git --version
git version 2.48.1.windows.1

Charlie Hernandez@LAPTOP-53GCKKDB MINGW64 /

$ D
```

To be done - figuring out what to put in the .gitignore file and what it all means
